at least 3 cons

Mats Nilsson

A system on autopilot

- Svenska kraftnät gets to rest
- The system will work technically as long as there are no unusual circumstances (cf airbus crash outside Brazil)

PRO!

(They are in effect replacing 100 years of experience with a computer model)

CON!

- 20% higher prices in SE3
- Higher prices in all of Sweden

CON!

No more intraday!

CON!

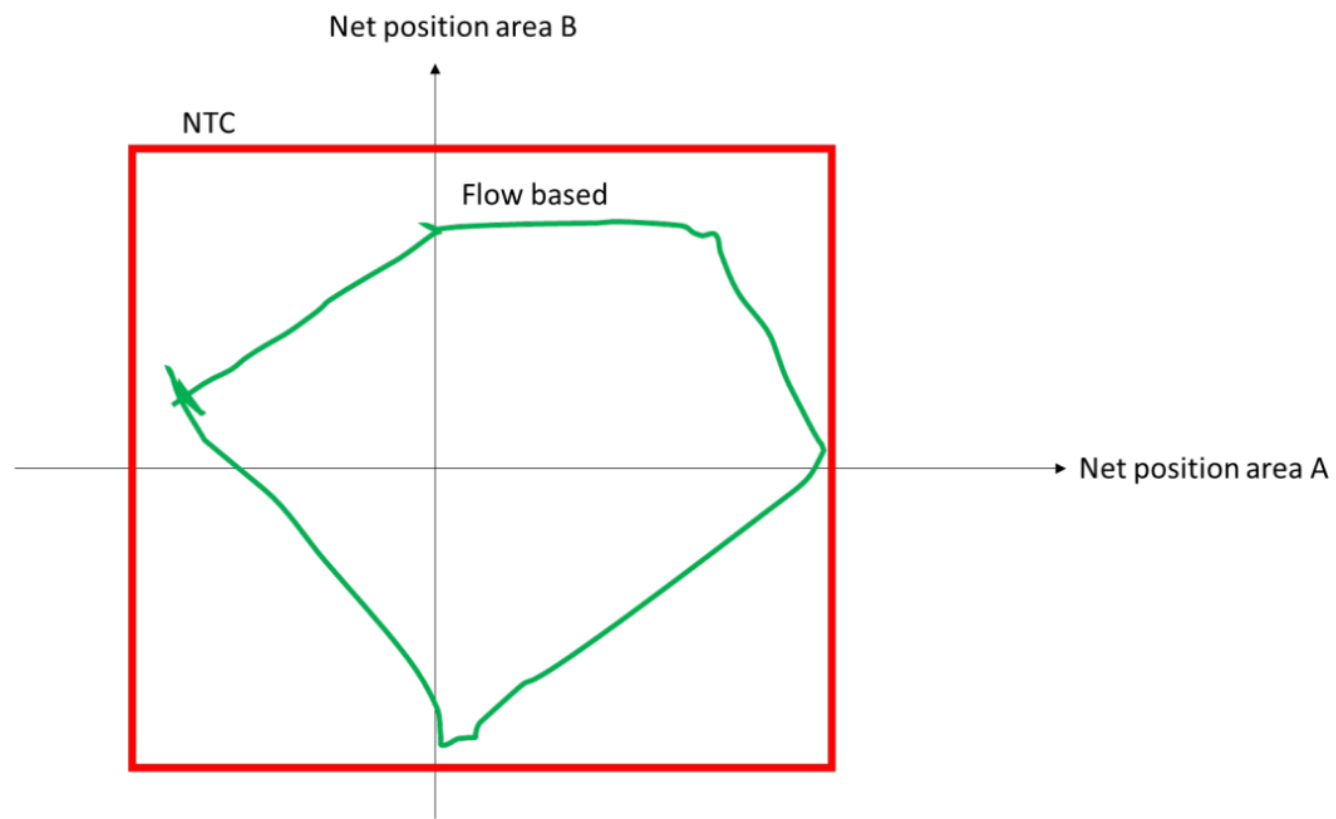

Figure 2 Restrictions and bad parameter choices leading to a smaller domain.

This has the potential to be worse than the Energiwende!

- Thanks for listening!

...e than the Energiwende!

...ning!
